cocktail counters

product information

It is almost unthinkable to imagine modern gastronomy without the cocktail bar. Cocktails prepared by a professional bartender are an absolute highlight and convey an ambience of lifestyle and sophistication.

We have composed some basic models, which you can modify and add to according to the barkeeper's special style of working. Or create a completely new cocktail bar with open compartments for beverage bottles, closed compartments for storing accessories, bottle stairs, ingredient racks for GN containers, crushed ice and waste containers. In addition, the well-designed working elements such as speedracks, cutting boards, glass showers, etc.

All elements are manufactured in food-grade stainless steel AISI 304. The stainless steel cover has a wetness protection coating on the underside and can be completely covered with stainless steel on request. Individual elements are also possible here. A leftover sink or a throw-in chute with waste garbage can? An additional drip tray or another basin?

Let us know your very special wishes and we will work with you to plan your individual cocktail counter.

Useful add-ons
Waste bin with throw-in chute and leftover sink

Glass basket compartment for quick collection of glasses for the dishwasher

Combineable and angled
In addition to our suggestions for the basic models you are able to put together your cocktail bar as you like.
